Information Systems Associates, Inc. Completes Three Data Center Audits

Two Projects to Continue Later This Year

STUART, FL -- (Marketwired) -- 06/18/14 -- Information Systems Associates, Inc.(OTCQB: IOSA), a professional services and consulting organization specializing in Data Center audits, announced today that the Company has recently completed three professional services engagements. Two of the three projects were with large financial services companies including a major investment bank and a multi-national insurance company. The third deal is with a major state government. All three deals were secured through ISA's strategic partners.

Commenting on the successful completion of these latest data center audits, Joe Coschera, ISA's Chief Executive Officer said, "We continue to be selected to provide information technology audit services for very large data centers by achieving a better than 99% level of accuracy, and meeting or exceeding the client's requirements." Mr. Coschera went on to say that the combination of the Company's patented process and skilled consultants gives the Company a significant edge over its competitors in this regard.

Utilizing a patented mobile data center asset management process, the audit team received crucial real-time feedback on the accuracy of the data being collected. This allowed them to quickly collect the data and produce timely reports. ISA's focus within the Information Technology Asset Management (ITAM) space is data integrity which is the key requirement in how to efficiently manage data center growth. Because of the relentless growth of data centers driven by cloud computing and social networking, the requirement for IT asset management is becoming a critical dimension for the management of these centers.
